Dear NRC,

I praise you for working so hard to establish safe standards for recycled radioactive waste. In time you may even be able to predict the rates and kinds of cancers associated with various levels.

Then we can all make informed decisions about a toy or pot or car, depending upon the statistical chances of cancer.

Until then, we need a law either forbidding use of waste, or at least clearly telling consumers of its use, the same as for irradiated food. Don't you
