DOCKET NUMBER
PROPOSED RULE PR 20
(64FR35090)

2590 N. River Rd.
West Lafayette, IN 47906-3740

February 23, 2000

'00 MAR -6 P4:25

Chairman Richard Meserve
U.S. Nuclear Regulatory Commission
Washington D.C. 20555

Dear Chairman Meserve,

We are alarmed to hear that BNFL (British Nuclear Fuel) wants to recycle radio-active waste metals from Oak Ridge Uranium Enrichment Facility — and that these metals would actually be used in everyday household products — even children's toys! As citizens we insist that no radio-active substances are ever recycled and used in any way that exposes any life forms to radiation. Better solutions to this horrible problem of nuclear waste disposal must be found!

Sincerely,
Joseph + Bette Rubinstein
