Re: Colorado Radioactive Material License No. 660-01, Umetco Minerals Corporation Maybell Site

Dear Mr. Lohaus:

Enclosed is the *Decision Analysis – Proposed Amendment to Renew License*, including the proposed License #660-01 Amendment No. 16. These were published January 14, 2000 for a 90-day comment period. These documents are provided for your information as a matter of general interest and good communication in the context of Colorado's Amended Agreement with the U.S. Nuclear Regulatory Commission. While NRC will eventually have a concurrence role at the time of Maybell site final closure, no particular technical assistance is requested at this time.

If you have any question on this matter, please contact W. Jake Jacobi of the Radioactive Materials Program.

Respectfully,

David A Butcher
