BRIGHTON, MASS. 02135
2/25/2000

To the Honorable Richard Meserve:
Chairman, U.S. NRC

I fully support the Nuclear Information & Resource Service's petition to intervene in the OYSTER CREEK license transfer and against any operation by AMERGEN of U.S. reactors.

AMERGEN is financially and morally unqualified. Their track record is terrible - they care nothing about public safety or the environment.

The U.S. has a growing CANCER epidemic almost all due to the worsening environment.

Please decide in favor of the public safety & the environment.

Yours truly,
Betty Latner
