Dear David L. Meyer,

I am very opposed to the High Level Nuclear Waste Storage Facility proposed on the Skull Valley Reservation, Utah.

First of all transporting these kind of materials could prove to be very dangerous!!

This nuclear waste facility is proposed to be temporary!! What a waste of money!!! Then there is no guarantee the waste will be removed. that means we are left holding the bag.

It sounds like to me that no one has come up with the right solution. With all the intelligence that we have in this country + the modern technology we have at our finger tips. Why can't someone figure a better solution!!.

We are depending on all of you to come up with a better solution! Has prayer gone out the window? Do we feel more superior than our forefathers who wrote the Declaration of Independence? There is a man out there that has the right solution, listen with your hearts!!! I don't think that anyone of us would want this waste in our back yards and I am sure that another country wouldn't either.

We in Utah and everywhere are depending on your expertise in solving this matter in a civilized way to benefit all of us.

Sincerely

Mr. Larry Hawkins
