Dear David L. Meyer,

RE: NUREG-1714, Draft Environmental Impact Statement (DEIS) for the Prop[osed Private Fuel Storage LLC (PFS) Independent spent Fuel Storage Installation (ISFSI):

I oppose the opening of the Goshute Skull Valley Nuclear waste storage facility. This issue bears enormous significance and will negatively impact the state of Utah. Our citizens deserve reasonable public accessibility to the DEIS, Draft Environmental Impact Statement (a 500 page technical document). The public and the business community need extended time to review the DEIS, bring public awareness to the issues, and create dialogue for citizens questions. This licensing process has failed to disclose pertinent information regarding emergency preparedness, risk factors on the transportation corridors and financial information needed to assure stability for this long-term nuclear waste facility. This information is needed to further Utah's position regarding the citizen's health, welfare and safety. If Utah cannot be provided this information, the NRC must deny licensing of this facility. I support the "No Action Alternatve".

Sincerely,

Jerry Johnson
