72-22

Dear Chief Meyer,

It has come to my attention, as well as the attention of many Utahns, that the U.S. NRC is considering a plan to transport large quantities of waste from Nuclear Power Plants across 30 states to be stored here in Utah on the Goshute Indian Reservation. Although the reservation land is not State land, the air we all breath doesn't recognise such boundaries. I am pregnant. I am concerned for the health and future of my child. As a Utahan, I do not accept the risks this storage facility would pose to me and my family. As an American, I do not accept the risks involved in transportation of such hazardous materials across the country. Did you know there are many geologic fault ~~like~~ lines here in Utah, some of which cross the proposed storage site? Please do not approve this plan - Thank you Mary S. Sa
