Dear Chairman Meserve:

The NRC is acting irresponsibly by advocating the "recycling" of radioactive waste into the marketplace. This puts the public and the environment at risk.

I want the NRC to put the public interest ahead of the nuclear industry and prohibit the release of radioactive materials into cemeteries, landfills, and incinerators; to identify, track, and recapture the waste that has already been released from power & weapons facilities.

This issue is too important to act upon with such disregard of public interest.

Sincerely
Beverly Bratton
