5/21/99

Julie Gregory called.

1) I told her what I understood about chrono relocation

2) She said:

- In addition to the dose relocation criteria in chrono, there is a cost relocation criterion (see pg. 7-4, Test for Cost Effectiveness)

- I can ask for additional output / intermediate output (see page 7-44, Diagnostic Trace Option)

- I could compare results w/ QHO

$$\text{risk of fatality} = \frac{\text{accidents}}{\text{yr.}} \cdot \frac{\text{fatalities}}{\text{accident}}$$

(RG 1.174?)
