(892)

'00 JUN 29 P3:49

6/24/00

To Whom It May Concern,

I am very concerned about the Department of Energy subsidizing the recycling of radioactive scrap metal from a former nuclear weapons plant in Oak Ridge, TN.

I would be interested in hearing your response to two questions: 1) how will the NRC determine what levels of radiation are safe for long-term exposure and how these low levels would be accurately measured; 2) does the NRC have plans to label these recycled items to allow the public to be aware of the exposure?

I will look forward to hearing from you.

Sincerely,

Sherry Kritzer
