Rockville, MD 20852

ADJ

Dear Commission Members:

I read with alarm about the DOE subsidizing the recycling of thousands of tons of radioactive-contaminated scrap metal from a former nuclear weapons plant in Oak Ridge, TN. Then I read about the NRC trying to establish standards that would set allowable radiation levels for recycled radioactive waste.

How can this be? Putting radioactive materials in anything that people use every day is just more than I can comprehend. And, especially, when it isn't labeled as such!

I vigorously protest!

Sincerely,

Corene Kelly
