Dear Officer of N.R.C.,

It's time the Nuclear Regulatory Commission regulates instead of promotes the industry.

I'm a thyroidless downwinder who lived in Pioche, Nev. (1956-1957 during on going atomic tests near there. We were told the fallout was "harmless salt - just hose it away." Several friends I worked with died of cancer years ago.

The P.F.S. duped the Goshute Tribe in Skull Valley. Nuclear waste is not safe - 500 yrs. plus is not temporary. (Countries distant from Chernobyl continue to suffer from that accident) Utah is already the dumping ground for chemical weapons, nuclear + toxic wastes. Enough is enough!

The above items cause loss of health + life. Put a stop to all further shipments to Utah! Think twice about letting the production of this lethal stuff continue.

Sincerely,

Lorraine Sager
