NOTES

(20)

Oct. 18, 2002

Dear Mr. Lesar,

I can't imagine how you can consider a uranium enrichment plant in the Hartsville area! This has been opposed in the past with great effort by caring people nearby and even farther away, who would be tragicly affected by an accident or even an attack. In these times this is no unrealistic fear. This would make a perfect target for a terroist air attack, putting at risk large populations not to far away.

I'm sure many of us would rather do on less electricity than to have to live with such an awful thought!

Sincerely,
Mary Kimbrough
