US Nuclear Regulatory Committee
Washington DC 20555-0001

Mr. Meyer + Nuclear Regulatory Committee:
I strongly oppose the storage of nuclear waste from Private Fuel Storage (or any other utility organization) to be stored in Utah at the proposed Goshute Reservation Nuclear Waste Storage facility. Utah is not a garbage dump for the rest of the country. I fear for our safety + even survival of our grandchildren for generations, as Utah is full of shifting faults + areas that experience earthquakes. Mixing nuclear waste + an earthquake would be fatal. There are 2 faults in the area by the site + three others in close proximity. I sincerely hope you take the health + well being of

ERIDS-03
Add Scott Flanders (SCF)

ADM03

Utahns and the millions of other US citizens into consideration.

Do not send this waste fuel to Utah. It is safer to keep it where it is produced. It is short sighted and reckless to ship millions of spent fuel rods across the country to store them for the suggested 20 years, only to move them again. This increases the risk of accident yet again.

Please pay attention to the people of Utah, the Goshute tribal members who see the danger + don't approve this disaster waiting to happen.

Sincerely -

Molly A Prince
