United States Nuclear Regulatory Commission

10-30-02

Dear, Michael Lesar, chief,
Rules Review and Directive
Branch, U.S. Nuclear
Regulatory Commission,

In regards to the proposed
Hartsville, Tenn. uranium enrich-
ment power plants.

I really do believe our water
supplies safety should be our
nations top priority - Safety.

Is there really a need for
this kind of dangerous facility?

Where is the waste going?

Thank you, Jackie Rogers
