Dear Michael Lesar,

Hello. I am writing in response to the proposed uranium enrichment plant by Louisana Energy Services to be built in Hartsville TN.

I feel that this plant would be a serious threat to the quality of life in our community. Fissionable uranium is one of the most dangerous substances known to man. After the Chernobyl disaster in 1986, cancer rate in nearby communities increased a hundred times. Having enriched uranium upstream from Nashville and upwind from Cookeville is an unexceptable risk.

For these reasons and many more I am opposed to the plant being proposed for Hartsville TN.

Thank You,

Kathleen Rodgers
