To Whom It May Concern:

I am a native of the state of Utah and am outraged at the thought of low level nuclear waste being stored a mere 45 miles from my home.

There is absolutely NO benefit for Utah and loss of many things, including peace of mind. Waste that is generated in the East should stay there. They benefit from the nuclear power (let the Eastern power plants) put their money into onsite disposal of this waste. Don't move it — figure out onsite disposal.

Add Scott Flanders (SCF)

Template ADM 013

I am a mother of two boys whom I want to enjoy in the future. We suffered from downwind 50 years ago and were promised all was "okay" and here we are again being promised all will be "okay".

Please DON'T DO THIS.

I am very opposed to the shipment of this waste to the Goshute reservation in Utah.

Please, please DON'T authorize the licensing of this facility here.

Sincerely,

PAMELA Goubaud-Littig
