Secretary, NRC
attn: Rulemakings & Adjudications Staff
Washington DC 20555

Sirs:

The scope of the U.S. NRC's proposed "rulemaking on controlling the disposition of solid materials" should be absolutely limited only to regulatory options which would strictly prohibit the deregulation of any solid materials containing or contaminated with manmade radiation and require that such materials be disposed of only in secure, licensed facilities designed to isolate such radioactive waste from humans and the environment.

NO RADIOACTIVE WASTE "RECYCLING"!

Yours truly,

Phillip Sgroi
849-7737
