B/H

most of the work involves preparation of [illegible] at Harvey and

transport to field locations where experimental work is done by the three [illegible] personnel.

[illegible] 1968 was the [illegible] large preparation of $H^3$ compounds & urinalysis was made.

$H^3$ compounds & stock solutions all are stored in hood which runs at all times.

N - building

$Co^{60}$ work is at a standstill at present but facility is still available for use.

3 - $Sr^{90}$ sources were disposed of 9-23-69 30mc to Atomic Disposal Co. - No other waste shipped since last inspection.

lab leak ~~test~~ 6-24-70 all < $2 \times 10^{-5}$ μc
2 - $Cs^{137}$ sealed sources were (300 mc ea)
1 - $Cs^{137}$ " " 10mc

leak test 3 times each year

Also 3 times a year smear survey of isotope lab shows ≈ $5 \times 10^{-5}$ μc [illegible]
