11/23/99

Mtg w/ Farouk, J Hannon, and others:

~~Uncertainty~~

~~Gone public~~

~~ACRS concern~~

~~Finalizing report~~
~~Going into compliance~~

~~Rev release~~

Farouk:

1) TH -- Results of 3D CFD calcs

2) Consequence -- more realistic assessment.

Consequence Analysis
- We know certain conservatism in consequence analysis.
- Do you want this additional work?

Chris Boyd:

TH
- Qualitative results

B/3

NRR: Consequence assessment:

- User need has been fulfilled.

- Ru — Canadian info.
- UO_3 release
- Zr hydride

Add things within time needed to respond to ACRS.

Addressing ACRS concerns ... can do this a little later.

Identify areas for future research — of conservatism
— of uncertainty large

by Dec 10

answers in February, when go back to ACRS. by (January 14)

Farouk said OK to this.

J Hoffman: • BC interaction needed prior to issuing my memo.
F Eltawila • I agree
