Attention: Dr. William L. Sutton, Secretary
Radiation Protection Committee

Gentlemen:

Enclosed are amendments to Byproduct Material License Nos. 31-461-19, 20 and 21.

You will note that Amendment No. 19 to Byproduct Material License No. 31-461-19 does not authorize your use of byproduct material (radioisotopes) in Agreement States. An Agreement State is a state which has entered into an agreement with the Atomic Energy Commission to assume certain regulatory authority of the Commission over radioactive materials, pursuant to Section 274 of the Atomic Energy Act.

Agreements with Kentucky, Mississippi and California became effective March 26, July 1, and September 1, 1962, respectively. We have enclosed copies of the AEC regulation, Part 150, under which the transfer of regulatory authority to Agreement States is made, and a copy of the AEC-Kentucky, AEC-Mississippi and AEC-California agreements. Announcements will be made as additional agreements are completed.

You will note that Section 150.20 of the enclosed regulation provides recognition by the AEC of Agreement State licenses for temporary use of byproduct material in non-Agreement States. It is our understanding

DIV. OF COMPLIANCE
REG. 1, USAEC, N.Y.

ITEM # 42 OCT 24 2 31 PM '62

(2)

that Agreement States will provide similar recognition of AEC licenses. With respect to the use of byproduct material within an Agreement State, you should write to the State Regulatory Agency responsible for the regulation of byproduct materials. We have enclosed a list of the responsible agencies to contact within each of the Agreement States.

Very truly yours,

Robert E. Rehlman
Isotopes Branch
Division of Licensing and
Regulation
