11/8/99

CT:

SFP dose calcs -- do a couple more

1. Change 4 rem to 2 rem
2. Change Ruthenium release — T vs. volatility

Write another memo-to-NRR.

B/20

CT:

11/5/99

I. Followup on Ruthenium release (from today's ACRS mtg)
- what does Nate think
- what does Canadians think.
- look at Dana's report on air ingression.
- what chemical forms could ruthenium have?

II. Follow up on hydride nodules phenomena / talk w/ D. Powers about this.

11/5/99

SFP Consequences

Disc w/ CT:

- Less Cs release
- Longer release duration
- Credit for aerosol dep. prior to going offsite.

11/15/99

Jason:

Run MACCS w/ 1 core at final S/D to compare w/ an SFP accident.

(CT said OK.)

a Severe reactor accident
