4/5/99
@ 2:00pm

Spent Fuel Pool

Working group mtg every Thursday at 1 p.m.
(starting 4/15/99)

Boral melts at 640°C

Ed Connell:
1427 C zircaloy oxidation reaction

Probabilistic Risk Assessment

No containment building.
How will you contain the release?

My effort is rather limited.

Somebody needs to put together Level 1 + 2 PRA event trees

C/S

Glenn is doing the core of the project.
He is doing the Level 1 event tree.

Glenn: on a qualitative basis, can do Level 1 analysis

- Evaluate release fractions.
  {compare w/ BNL

Joe: Gary said come out with basis of what we do believe.
