Subject: Summary of our telecon meeting on Groundwater Program Basis for WestJefferson of 5/17/05

On 5/17/05 from 1:30PM to approx 3 PM a telecom was held with: Peter Lee, Mike McCann, John Tholen, Jim Hallgren, Joe Jacobsen, John Peckenpaugh (NRC-HQ Technical Specialist) to discuss what is needed by John P. to complete his assigned task order form Mike to evaluate the groundwater basis program for the West Jefferson Site. Battelle had formerly sent the original basis documentation from 1989-1990 that described the evaluation that resulted in the original placement of the groundwater monitoring wells for the coming decommissioning action at the site. As a result of this teleconference the following actions were taken by Battelle to provide John P. and copy Mike on the following items:

* Develop a singular map that includes all the groundwater monitoring well locations, groundwater supply wells, and surface water collection locations both for this evaluation as well as to be later used for the public info. Meeting perhaps
* Verify whether in 2000-2001 time period we switched to filtering water samples prior to analyses and that in the summary tables in the Site Environmental Reports for 2000 and 2001 this is what accounts for significant difference in results
* Find out what the State of Ohio rules are for sinking walls for drinking purposes as to required minimum depths
* Provide the 1995 DOE report "Groundwater Assessment"
* Provide the 2001-2002 report that discusses the groundwater directional maps/text for the site
* Tie the depth to water levels provided already by well with the ground surface elevations
* Provide the raw data for the sampling events from 1989-current if possible- even better in table form- with an eye that this may end up being part of a presentation later to the public meeting forum

Commitment was made by Battelle to attempt to provide at least a partial packet of these items by the end of next week by fed ex.

Thanks,

Joe Jacobsen
