2/10/00

Mtg w/ NRR + Comm TA's on SFP:

[→ Shouldn't insurance cost less if risk is less.]

[CT: → Release of large amount of Ru could have a substantial impact on the consequences.]

TA1: Much better draft than June draft.

TA2: Fire in waste storage area?

NRR: We are having a contractor look at it.

[MACCS calcs w/ Ru:
Errors in inventory, DCFs, etc. ?]

F124

TA3: Zr fire – 10 to 12 hours to get Zr fire.
Adiabatic heatup?

Hubbard: No

TA3: Security -- how being dovetailed w/ Security Rulemaking?
Barrett: I do not know.

TA3: Late decommissioning?
Early decommissioning?

Barrett: Late decommissioning is after 5 years.

TA4: Do industry + NRC have tools to analyze TH

Holahan: We are sending a user need to RES on This.
Industry has used CFD, and have not been very successful.
