About 5 years

F/5

Put together packing of papers

Ru comes out in air

Stem

FP release experiments
- oxidise claddy
- then work on fuel
-

About 75 and 100% oxidized clad, before start to release the Ruthenium.

Ru

Segment of fuel rod
press end caps on

let boil away

oxidizes, cracks, releases fp / no pre-drilled hole

Run longer experiments than HI/VI

internet: jhs1@nrc.gov

Ray Dickson also working w/ L Dickson on these
FP release experiments
