DOCKET NUMBER
PROPOSED RULE PR 73
(70FR 67380)

Jan 22, 2006

DOCKETED
USNRC

February 1, 2006 (8:30am)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Secretary, U.S.N.R.C.,

Dear Sir, Madam,

Since your number one job is making nuclear power plants 100% safe, there is a feature needed to insure that. (78)

The missing feature is: a protective structure over a reactor building and fuel pool building. This structure would stop a 747 jet from going thru the roof of the fuel pool or going thru the containment structure over the reactor.

Also: Use what happened on 9-11-01 when making your new regulations. Because doing less would make it easy for terrorists to spoil our still beautiful country.

Thank you,

Peter Fox Sipp
