SFP Risk

- say "1 out of 200", not "99.5%"
- say "1 out of 20", not "95%"

- 99.5% number based on Canadian chemical spill where they evacuate 2 million people quickly

- Our response to NRR has to say "we do not agree with 95% evacuation.

- Use I + Cs release fractions from NUREG-1465
- Use I release fraction for Ru

- Only release FP's from 1 core (not 3.5)
