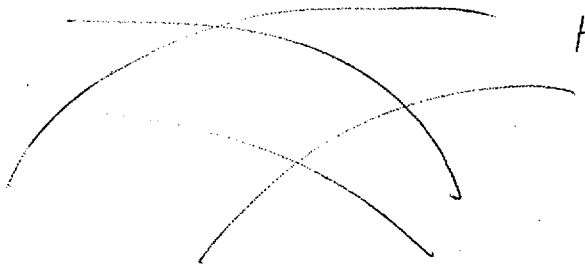
SFP Seismic

1.



HCLPF ≥ 3 × SSE
w/ exception from Gontam

⇒ ~ 10^{-6} return period

1). Gontam to provide seismic outliers + criteria
2). " " " things to check for when doing SFP
HCLPF calculation.
3). Convolution + check .05 × HCLPF (Robinson + Vermont Yankee)

2. Gontam says BWR will fail on cash drop.

→ Can I define load + limits - like height? — due in a couple of days

#5 Give To Gontam
pipe diameter + metal type
⇒ Thickness of pipe + pipe materials — To Gontam

"I case run kinda like NR-1150 calculations"

95% evacuate
5% don't
use Class D wind ~~stability~~. NR-1150 use Class A

[Charlie Tinkler + Jason ~~are~~ away this week]

Jim - plume duration
timing of evacuation
population density

Can use uniform met + pop density? Yes.
