6/5/00

1 yr → 2.5 yrs for 10 hrs if adiabatic

@ 1 yr 5 hr if adiabatic
@ 1 yr or 500-600K in 5 hr range
if both couple hrs if 500 + adiabatic

Can extend out the 5 yrs if reduce ventilation to small amount. ~~can extend out time~~ ~~can to get rain fire~~
Stuff Fall on racks extends time too

6/5/00 just a letter responding to the ACRS. He said go see George Hubbard.

Is Jason looking at fines? X5907

Faulk Cantor – 8.5 hrs? 6 hrs? 10 hrs?
6D12
X2907

Fuel fines sent over as a informal email as part of list what could do in a yr. No commitment yet from RES on this.

Sandia is looking at question of plume spreading. Running MAX 300 times. Will have distribution of doses.
