Credible ~~Seismic~~ Sequence Brainstorm

~~Define~~
Technical Terms -

General high level discussion of what was done in the credible sequences. Highlight what we are concerned about.

Initiator Freq × Failure 1 × Failure 2 × ... = λ of zirconium fire

a. initiator frequency high
b. driven by human error
c. limitations in PRA methodology for calculating cond. failure prob.
d. discuss top sequences & highlight concerns

Hadam Neck Tom Fredericks PM
