11/14/00

I. Rerun NUREG-1465 (modified) S.T., but this time with inhalation DCF's for Ru-106 set to 0.

- Start with DOSDAT.INP.
- Zero out the inhalation DCF's for Ru-106.
- Rename it DOSDAT1.INP

- Start with early2.inp (late evacuation).
- Change it to call DOSDAT1.INP
- Rename it early10.inp. ← This is dated 11/14/00 and is different from another "early10.inp" file on my PC.
