NEI
Partial Draindown

Staff Notes from 2/6/01 NEI meeting

Recommendations

- Complete report prior to applying results
  Ru, Partial draindowns, cask drop
- Conduct formal peer review
  like HRA
  get it right
- Apply complete study to a test case regulation, e.g., maintenance rule.
  Final Report Issue - ~~Take test case~~

Henry - Ru release
(using) Misner - Mechanistic evaluation
MY Load drop
No leakage > 5gpm
Below grade On bedrock
Drive to zero
Appendix 3 Footnote
Won't fail prol
MY has both
MY things report refocus on cask drop.

Operating Facilities?
TWG Process & how we apply risk to regulations

Fire fire never going to zero

NEI

Encourage

Differences in PWR & BWS

Drop Cask Tornado Impact tests at SNL

MM little more work can reduced Ru release by 2 orders of magnitude

<u>Dave Lochbaum</u>

Not recommend more work
Should be under Part 72

Plant PRA not open to public

~~Con~~ Ten commitments & order of magnitude - where

UCS ~~Don't~~ doesn't believe any plants meet 10 committments

Last Thing security
No number
Force on Force on operating SFP to success
Calculate health less than margin
qualitative

General Comments Peter James Atherton
Dr Hanauer report & PRA

- No substantiative
  How do you instill public confidence
- Seismic check list
  How do you verify through checklist
  Particularily
- Not realistic addressed
- Experimental test to show what is
  out there.

Policy outside of report
