Mail Stop T6D59

Dear Sir,

Thank you for the opportunity to comment on the new fuel fabrication facility slated for the Savannah River site in South Carolina.

I want my tax dollars to be used to immobilize the bomb grade plutonium. This way the weapons grade plutonium would be so highly radioactive the plutonium would be theft proof, and the biggest reason is because there would be so much less waste to deal with.

I want the N.R.C. to deny the M.O.X. license.

Thank you and everyone at the N.R.C. for making decisions that our future generations can healthfully live with.

Sincerely,
Peter Fox Sipp
