Subject: Fwd: Info requested for the July 10 and 11 meetings

>>> Mark Notich 6/22/2006 3:46:14 PM >>>
Tom:

Following a discussion with the team, here is a list of documents and information that we request be available during our meetings on July 10 and 11:

-The report from New South Associates on the cultural and historic resources surveys done on-site
-Any information available on the archaeological issues from the transmission line surveys done is support of the original facility licensing. This is the issue that we talked about in late May that Jennie Davis brought to my attention.
-Latest information on the re-design of the water intake location
-Any details on the next phase of archeological work to be done at Plant Vogtle.
-Copies of any letters or communications with the SHPO
-information on severe accident analyses specific to Plant Vogtle. The TOC cites Design Basis Accidents but isn't specific as to whether these are design basis accidents for the AP 1000s or site-specific accidents.
-Input parameters used in GASPAR, LAPTOP, PAVAN, XOQ/DOQ, CORMIX, and other models used in the development of the Draft ER and also input records for any heat dissipation plume modeling that was performed.

Also attached are files that contain a roster of the NRC/PNNL people attending the meeting and a draft schedule for July 10 and 11. If you have any questions concerning any of these requests or attachments, either call Christian Araguas at 301-415-3637 or e-mail me and I'll respond on or after June 30.

Thanks,

Mark D. Notich
