SUBJECT
Control No. 315999 – Re - License renewal request by Grear Lakes Soil & Environmental Consultants, Inc. via letter dated February 1, 2007, for NRC License No.12-26735-01.

SUMMARY
In a telephone conversation with Mr. Balekai on this date, the following matters were discussed:

1. I noted that we have processed his letter dated 2-1-07 as the timely request for renewal of License No.12-26735-01.
2. We expect the licensee to submit the regular information needed for license renewal by 3-15-2007. It is suggested that this be submitted using the format in Appendix B of NUREG-1556, Vol. 1, Rev. 1 (dated November 2001) "Program-Specific Guidance About Portable Gauge Licenses" in order to expedite the renewal of the license.
3. Also, please note that in accord with current NRC policy related to security measures, we need the licensee to specify a total possession limit, to be added to License Item 8 for each radionuclide (Cesium-137 and Americium-241) to be listed in License item 6 of the subject license, as renewed. This possession limit can allow for temporary replacement of gauges and/or planned expansion of gauge usage but be aware, that above certain levels, the licensee may be subject to increased control measures. You may wish to call and discuss these levels before selecting possession limits.
