James Curry - GPU Oyster
Alan Nelson NEI
Mike Haggert GPU

Ray Shadis - needs to be clear what applies in decommissioning
Have in one document
even suggested a decommission licensee

John Z - Summary of ~~clarif~~ comments
Have clarity
Gary - may not need to be in one place, but needs to be clear

Misner
Less chance for operator error in decommissioning plants vs operating

Human error - Glenn

Gary Realistic access plants

Misner
Seismic - Page 3 - use prior decisions

Reduced risk by 3 orders of magnitude from operating plants

9/57

Wa Chang - Zircoloy manufacturer

Jim Curry Oyster Creek - Did Sharp analysis
Not happy with

Robustness of pool with robustness
supporting system

yes Different classes of plants

Lynette Frustration - Seismic - Duke
work with NEI

NUREG 1353 — Greatly decreased
uncertainty

Whole curve vs point of curve

Pete
Defense in depth - don't have in SFP
Consequences to environment ~~no~~ more
Objective not to have release to public
Justifying what you have is o'k
Make risk of accident lower for SFP
Aging, using beyond life?,

Gary
Explain how defense in depth enters our decisions

Ray Shadis
Independent SFP cooling system
Pump down to within top of ~~pool~~ fuel
Is pump cooling/Should – Page 2 of

Transcript on web

~~Something~~
No anotation of degree of certainity

Qualification not meeting
Masnik – no way can happen.
