1. The total actions are completed.

2. You are correct and it may be that Envirocare may not be the entity receiving the waste. We are still working on that.

3. It does include the waste currently being generated. The current waste being accumulated is miniscule.

Thanks, Larry, for the quick update.

A few clarifications:
1. Does the percent complete indicate that the total actions are completed, or that billing/payment is completed? Do you expect additional bills for waste characterization, or packaging/transport to Barnwell?

2. Because you left the 'percent complete' blank for envirocare wastes, I assume that no actions and/or no billing was incurred so far for these activities.

3. Solutient referenced several sections of the Settlement Agreement in their proposal, all of which referred to the pre-2000 tritium waste. Will any of the wastes currently being generated be included in shipments to Envirocare, or will you have to obtain another contract and estimate for that?

thanks,
Betsy

I have revised the table (see the attachment).

Larry,

I just received your 7/17/07 request for additional funds from the trust account. I am attaching a table, based on the Solutient January 2006 proposal, of the estimated costs and actual costs, as we understand them. Before we release additional funds, I need you to review this table and let me know of any changes/corrections/etc. In the bill submitted with the June 27, 2007, letter, Solutient indicated that waste packaging was "23%" completed. Does this 23% refer to Barnwell waste, or all tritium wastes? We would like an estimate of the percent completion for the different tasks listed in Solutient's proposal.

I used Wordperfect to develop the table, then converted it to Word, so you may have trouble manipulating it. If you do, just print out a copy and fax me a marked up/corrected copy.

Also, the letter approving the 6/27/07 request for funds was signed July 13 and mailed out yesterday. I am attaching a pdf copy of that letter.

Betsy
