Don,

Thanks for your response to our request. We appreciate Entergy's willingness to provide one set of drawings for placement in one of the public libraries. As I mentioned on the phone call, we will redact two of the drawings (LRA-9321-70093-0 and LRA-9321-4006-0) that contain sensitive unclassified non-safeguards information (SUNSI). These two drawings will not be made publicly available in the library nor in ADAMS.

Again, we appreciate your cooperative spirit.

Kim

Kim,

We will provide one set of drawings after the sufficiency review is complete.

Don,

See response from Garry Young below. We will provide a set of drawings after the sufficiency review is complete. There will only be one set, since that is what Kim told me that NRC wants.

Thanks
Mike

In the interest of cooperation, I think we should provide the drawings. Let's go ahead and start making the copies. However, let's wait until after passing sufficiency before putting the drawings into the library (more than one I assume).

Subject: IPEC LRA Drawings for the Public

Garry,

At the IPEC public meeting, Reza and I were talking to Kim Green who now

works for NRC. She used to work for ISL when they were reviewing ANO-2 environmental report. Kim asked at the public meeting if we would consider providing a full size hard copy set of the IPEC LRA drawing that the NRC can place in the public library. I told her that we would consider that after they complete the sufficiency review of the LRA. I talked to Don Croulet this morning and he had talked to Kim last Friday and she had mentioned that she and I had talked about the drawings. Kim also said that we can decline to provide the drawings since they are not required and the drawings are already in Adams and on the CDs that we provided. Let me know what you think about this request.

Thanks

Mike
