Subject: Re: Davis-Besse FOIA Requests/ RIO Estimates

Eric,

We don't have any records, in hard copy format in the file that go back to the April 2000 outage, other than inspection reports (we don't keep files that are more than about 3 years old except for IRs and some select large reports from the licensee that are kept in the bookshelves in my office) so:

For the April 2000 outage estimate is **1.5 hours** for search and potentially maybe **1 inch of material** (mostly inspection reports unless we run into something in bookcases). We may or may not also have some pictures in JPEG format.

JER

For the Exponent report we have already provided you, at your request, the information/documents/e-mails that we had up to and about the beginning of April. Presuming we have to repeat those searches and reproduce in hard copy and search other information since that time, estimate is: **2.5 to 3.5 hours and about 3 to 5 inches** of material (the stuff we already sent you was probably close to 1.5 inches). We also have a CD with the Exponent report.

>>> Eric Duncan 5/2/2007 1:02 PM >>>
To all,

Please find attached two (2) FOIA requests associated with Davis-Besse.

The first request is associated with the Exponent Report.

The second request is associated with the NRC's oversight of boric acid leakage and corrosion control at Davis-Besse during the April 2000 refueling outage.

At this point in the process, we have only been requested to provide estimates (search time, review time, and amount of records) on the subject material we may have in our possession.

Because FOIA requests are of high priority, the due date for this estimate is this Friday, May 4.

Although the requested information is associated with Davis-Besse in Branch 6, I thought it prudent to make all of the DRP branch chiefs aware of the request in the event that there is material that is subject to this request in your possession.

Please respond to me as soon as you can so I can complete the estimate by the May 4 due date. If you do not have any records, please respond accordingly.

Eric.
