Dear Mr. Frohboese:

This is in response to your January 25, 2002, letter to Richard A. Meserve, Chairman, U.S. Nuclear Regulatory Commission (NRC), concerning the requirement for each Federal agency to submit an annual report on the steps taken to comply with Section 308(a) of the Age Discrimination Act of 1975, as amended. This report covers Fiscal Year 2001.

The NRC's regulation implementing the Act was published in the Federal Register on July 7, 1987, (52 Federal Register 25358).

With reference to the other information requested, the NRC's involvement in Federal financial assistance continues to be limited to training programs for State personnel, and assistance relationships (grants and cooperative agreements). The training is performed pursuant to Section 274 of the Atomic Energy Act of 1954, as amended, which provides for States to assume certain areas of Federal regulatory activities. The training is designed to provide State employees with technical and administrative skills, as well as to develop an understanding and ability to apply regulatory concepts and procedures relative to radiological health and safety. The assistance relationships are with eligible recipients for projects relating to nuclear safety assessment. Recipients are periodically reminded of their responsibility to ensure that activities covered under the Act are provided in a non-discriminatory manner.

The NRC has received no complaints of age discrimination in connection with the implementation of these programs.

We continue to believe that any age discrimination which might occur in our program of Federal financial assistance can be identified and eliminated through our continuing assessment of the activities of the relatively small number of recipients involved.

Pursuant to OMB Circular A-40, dated May 3, 1973, the cost to the Agency of completing this report is approximately $100.00.

If you have questions regarding the above information, please feel free to contact me at (301) 415-7380.

Sincerely,
/RA/
