OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Attention; Rulemaking and Adjudications,

I am writing in reference to Energy Solutions Import License Applications IW023.

I am in complete opposition to any foreign nuclear waste being imported into my country for any reason. We should not allow any nuclear waste of foreign countries to be brought into the United States for storage, transfer, reusing, repackaging, reprocessing, deprocessing, incineration, distruction, restructuring, research, burial, reclaiming, recycling, redistribution or disposal. We should not apply any other term, word or phrase, to the process of the United States receiving any nuclear waste from any other country for any reason, and then approve any such language into any laws, regulations, rules, contracts or binding agreements. Language should be written into our laws, regulations, rules, contracts or binding agreements, that not only ban import of foreign nuclear waste onto our lands, but also from our waters and airspace.

Come On People! I am having a hard time believing that You are even considering such a proposal. Do the right thing Ban the importation of foreign nuclear waste!

Thank You,
Christa Bean
