Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - ERCW PUMPS - NCR 2461R - SUPPLEMENT TO FINAL REPORT

The subject deficiency was initially reported to NRC-OIE Inspector M. Thomas on October 6, 1980 in accordance with 10 CFR 50.55(e). Interim reports were submitted on November 5, 1980 and January 21, 1981, and our final report was submitted on April 8, 1981.

As discussed with NRC-OIE Inspector D. Quick on April 28, the date of April 30, 1982 for completion of corrective actions indicated in our final report on this matter was not met. This is due to continued difficulty with the vendor in meeting dates for the delivery of the required pump mechanisms. The corrective action on this matter will be completed by fuel loading of unit 1.

If you have any questions, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
