Atlanta, Georgia 30323

Dear Dr. Grace:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - FAILURE TO DOCUMENT DESIGN BASIS CHANGES FOR FIRE DAMPERS - WBRD-50-390/85-15 AND WBRD-50-391/85-16 - SECOND SUPPLEMENTAL FINAL REPORT

The subject deficiency was initially reported to NRC-OIE Inspector Al Ignatonis on March 4, 1985 in accordance with 10 CFR 50.55(e) as NCR WBN MEB 8513. Our final report was submitted on March 21, 1985. Below is our second supplemental final report.

As discussed with NRC-OIE Region II Inspector Bob Carroll on March 17, 1986, the date of March 14, 1986 for completion of corrective actions indicated in our final report was not met. Because of the emphasis on reviewing environmental qualifications of safety related equipment, issuance of the affected system description has been delayed. This item is not considered necessary before fuel load. The corrective action on this matter will be completed by December 30, 1986.

If you have any questions, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

J. A. Domm
