Subject: Emergency Evacuation Routes for Avila Beach, CA.

Dear Sirs;

The community of Avila Beach is located on the central coast of California and is the community located nearest to the Diablo Canyon Nuclear Power Plant. Currently, all traffic that flows into or out of Avila Beach must travel on Avila Beach Drive and during various events, this single roadway becomes congested.

Recently at a public meeting of the Avila Beach Community Services District, the residents in the area requested information from the County Office of Emergency Services (OES) concerning the emergency evacuation routes for Avila Beach in the event of a natural disaster. As a part of that discussion, members of the community recalled that during the licensing of Diablo Canyon Nuclear Power Plant, Cave Landing Road may have been identified as the evacuation route for Avila Beach. However, no records of this designation have been located.

As a follow-up to the presentation provided by County OES, members of the Board requested that staff contact your agency to determine, if in fact, Cave Landing Road was ever designated as an emergency evacuation route.

Any assistance you can provide concerning this subject would be greatly appreciated. Should you need further information please contact our office at 805-595-2664.

Sincerely,

John L. Wallace
General Manager
