Joe,
Please note that **TVA committed to change the application**. In the Response to Item 1:
"…TVA is planning to revise the referenced figure (FSAR Figure 2.4.3-249) in a future revision…"

In the Response to Item 2:
"…TVA intends to rerun the updated SOCH models with the final Chichamauga Lock design information and update the PMF results for the BLN site as necessary…". **Although TVA didn't commit to change the application, results should be incorporated into the FSAR <u>if the PMF results change</u>.**

In the Response to Item 3:
"…TVA intends to calibrate and verify the updated SOCH models against the more recent observed flood data of 2003 and update the PMF results…". **Although TVA didn't commit to change the application, results should be incorporated into the FSAR <u>if the PMF results change</u>.**

Chris

My answer is no at this point. The document will be on the docket so it can be referenced in future eRAIs and also in our SER. If there is something in the response that we believe should result in a change to the application then I need to make sure that is somehow captured.

Joe,
Does this exchange of information, which looks a lot like RAIs + responses, need to be entered into the e-RAI system?

Chris, Ken, and Mark,

I was not expecting the attached letter from TVA, it addresses the review items that we had in the inspection report.
