Sam,
Yes this has been worked out. Could you prepare a statement of work and cost estimate to complete the research?
Thanks
Ellen

Ellen,

I got a phone call last week from (I assume) one of Mr. Rodriguez's supervisors insisting that the federal govt. would not pay a university for this type of work. Do you know anything about this? Our conversation sort of closed on the fact that someone could come here and gather the information themselves free of charge, but since we are a 'sponsored program' (i.e. - our salaries are not funded by the university) we cannot do this type of work gratis.

If you've worked this out with them, or want to double check it, I'll be happy to work you up a more formal proposal.

Thanks,
-sam

Hi Sam,

Could you prepare a more formal estimate and statement of work for the subject services?

Can this be done relatively soon?

Thanks
Ellen

Hi Ellen,

We can prepare the requested materials for you, including site file forms & survey reports. It would cost approximately $250/day for the salaries, plus photocopying (I might can save you some $ on that if you would like to have the reports is PDF format).

Let me know if you'd like for us to work on this for you, and if you need a more formal proposal.

Regards,
-sam

Apologies to everyone, I did not attach the maps. Please find them attached here.

Thanks
Ellen

Sam,

I am an archaeologist from the Pacific Northwest National Laboratory working with Mr. Rafael Rodriguez of the Nuclear Regulatory Commission on the Bellefonte Combined Operating License Application. Rafael indicated to me that you and he discussed our need to conduct an archaeological site and surveys records search for the Bellefonte Nuclear Plant and that you need more specific topographic location information. Is this a search that we can conduct ourselves or is it one that the Office of Archaeological Research can complete for us?

Enclosed are a few maps that were submitted as part of the application that show the location of the Bellefonte site on a USGS topographic map. These were scanned in as one pdf file.

The first map shows the Bellefonte property boundary.

The second map is a zoomed out map showing the Bellefonte Plant, and approximately a one mile radius around the plant, and locations of existing transmission lines.

The third map shows the existing transmission lines.

The fourth map shows the Bellefonte Plant and NRHP and ARLH listed above-ground historic properties within 10 miles of the Bellefonte Plant.

We would like to obtain archaeological site information for archaeological resources and surveys located within Bellefonte property boundary and existing transmission lines, as well as resources located within one mile of the Bellefonte property boundary and transmission lines. We would also like to obtain copies of archaeological survey reports conducted within approximately 10 miles of the Bellefonte property boundary and transmission lines.

Please feel free to call me on 509-371-7105 for clarification purposes if needed.

Thank you,

Ellen
