UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 4, 2002

Richard G. Irwin, Director
Incident Management
Office of Homeland Security
The White House
Washington, D.C. 20502

Dear Mr. Irwin:

This is a followup to Chairman Richard Meserve's letter to Governor Ridge, dated August 19, 2002, concerning the Homeland Security Advisory System (HSAS). In that letter, the Chairman advised that the NRC had implemented a Threat Advisory and Protective Measures System, effective August 19, 2002, to conform to the HSAS. This NRC system implemented a means of communicating changes in the threat conditions to our licensees, provided a system for activating our Incident Response Center in times of heightened threat, and implemented guidelines for responding to changes in the threat condition at NRC facilities.

The NRC Threat Advisory and Protective Measures System was provided to the NRC's licensees by means of Regulatory Issue Summaries (RISs), copies of which were enclosed in the August 19 letter. This letter encloses a new RIS issued to another category of NRC licensee. The RIS contains sensitive unclassified Safeguards Information (as defined by Section 147 of the Atomic Energy Act of 1954, as amended) and must be protected in accordance with 10 CFR 73.21.

If you have any questions on this matter, please contact me.

Sincerely,

(/RA by R. P. Zimmerman)

Roy P. Zimmerman, Director
Office of Nuclear Security and Incident Response

Enclosure: Regulatory Issue Summary 2002-12B

Notice: When separated from Enclosure, this page is "DECONTROLLED."

Safeguards Information must be protected from unauthorized disclosure in accordance with Section 147 of the Atomic Energy Act of 1954, as amended, and with 10 CFR 73.21. Violations are subject to civil or Criminal penalties.
