May 24, 2000

William A. Eaton, Vice President
Operations - Grand Gulf Nuclear Station
Entergy Operations, Inc.
P.O. Box 756
Port Gibson, Mississippi 39150

SUBJECT: ASSESSMENT FOLLOWUP

Dear Mr. Eaton:

Our review of Grand Gulf identified that you have crossed the threshold for the Safety System Unavailability, Emergency AC Power performance indicator. Therefore, we plan to conduct additional inspection to better understand the causes contributing to your decline in performance.

This letter is to inform you that we will be planning supplemental inspection at your facility during the month of June 2000 to determine that the root causes and contributing causes are understood, to provide assurance that the extent of condition is identified, to provide assurance that corrective actions are sufficient to address the root causes and contributing causes, and to prevent recurrence.

In accordance with 10 CFR 2.790 of the NRC’s “Rules of Practice,” a copy of this letter will be placed in the NRC Public Document Room (PDR).

Please contact me at 817/860-8243 with any questions you may have regarding this letter.

Sincerely,

/RA/

Joseph I. Tapia, Chief
Project Branch A
Division of Reactor Projects
