UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

COMMISSIONER

6.1.2000

Dear Gerry:

I located a graph (from one of my speeches) that clearly shows the large negative impact of inflation and high interest rates on the nuclear power plant construction costs, and as a major contributor to halting new construction. The attached graph is self-explanatory but I would be happy to discuss the finer points with you, at your pleasure.

Sincerely

Nils
